

Guide to choosing a Behavior dataset

July 5-23, 2021

Everyone should consider the behavior-only datasets that we have, which are very rich with many subjects and many trials.

Caltech

The Caltech dataset ([youtube](#)) has pose-tracking data from socially-interacting mice, and is well supported with code and a project template.

	Run	View
Loader notebook	 Open in Colab	render nbviewer

IBL

The IBL dataset ([youtube](#)) is a visual decision-making task, that is very similar to the one used in the Steinmetz dataset.
